PROFILE SUMMARY

Enthusiastic and detail-oriented Computer Science student with a strong foundation in programming, software development, and analytical problem-solving. Skilled in Python, Java, and C++, with hands-on experience building technology-driven solutions, including disease prediction and biometric-based detection systems. Passionate about continuous learning and applying technical expertise to solve real-world challenges.

EDUCATION

B.Tech, Computer Science & Engineering (Health Informatics) *2023 – 2027 (In Progress)*
VIT Bhopal University | CGPA: 8.59

Senior Secondary (12th Grade), CBSE *2021 – 2022*
Kendriya Vidyalaya No. 1, Amritsar Cantt | Percentage: 89.4%

Secondary (10th Grade), CBSE *2019 – 2020*
Kendriya Vidyalaya No. 2, EME Vadodara | Percentage: 92.8%

SKILLS

- Programming Languages: Python, Java, C++
- Machine Learning & AI: Support Vector Machine (SVM), Data Preprocessing, Feature Extraction, Model Training & Evaluation
- Tools & Technologies: Jupyter Notebook, Google Colab, Android Studio
- Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Fundamentals

PROJECTS

Blood Group Detection Using Fingerprints (ML Model)

- Developed a machine learning model using Support Vector Machine (SVM) to predict blood groups based on fingerprint patterns.
- Performed data preprocessing, feature extraction, and classification to improve model accuracy.
- Achieved 94.63% classification accuracy (macro F1-score: 0.9488) across eight blood group categories using a linear-kernel SVC on Img2Vec-extracted feature vectors.

Multi-Disease Detection System

- Designed a predictive system using SVM for early detection of multiple diseases, including Heart Disease, Parkinson's Disease, and Diabetes.
- Integrated the model with a web application to provide a user-friendly diagnosis interface.

PUBLICATIONS

- Co-author, "Fingerprint-based Blood Group Detection Using Machine Learning," 2025 International Conference on Electronics, AI and Computing (EAIC), IEEE. DOI: 10.1109/EAIC66483.2025.11101495

CERTIFICATIONS

- Applied Machine Learning in Python — University of Michigan (Coursera), 2026
- Python Using AI Workshop — AI For Techies, 2026
